

WANTO MINI

WANTO MINI

– Large-capacity dry toilet

The Wanto Mini gives you access to hygienic, user-friendly sanitation - even where there is no running water available. Featuring separate, integrated tanks for fresh and waste water, it offers a comfortable toilet solution anywhere.

Wanto Mini is ideally suited for industrial use, in mines or by road crews.

TECHNICAL INFORMATION

– Waste tank and fresh water tank

The Wanto Mini flushes like a normal WC, but uses minimal water. As a result, the toilet can be used many times before the tank containing water for the flushing mechanism needs to be replenished, making it an economical, low-maintenance solution. A manually operated sluice plate at the base of the toilet bowl separates it from the waste tank except during flushing. This shields the user from any unpleasant sights or smells when in its closed position.

Waste tank 140 litres, fresh water tank 40 litres.

– Ventilation

The Wanto Mini comes with two installation points for ventilation.

– Durable material

The Wanto Mini is moulded in two pieces which makes it very durable. The dark grey colour gives a modern look to the unit. With three attachment points, two for fixing to the floor and one for fixing firmly to the adjacent wall.

– Pump for flush

To flush, simply push down the pump on the upper part of the Wanto Mini. As a safety device, Wanto Mini is delivered with the pump embedded into the unit. A quick rotating hand movement releases the pump mechanism for use. Pressing down and rotating locks the pump into its previous position when relocating the unit.

– Dimensions and weight

Height (sitting): approx. 540 mm
Width: approx. 700 mm
Depth: approx. 700 mm
Weight: 25 kg

– Sanitation Liquid OdourLess

The OdourLess Sanitation Liquid efficiently removes bad odours and decomposes the waste naturally. The liquid is approved by the Swedish National Chemicals Inspectorate with Reg. No. 3958. Efficacious component: potassium nitrate (42%). Pour 1 litre of OdourLess and 10 litres of fresh water in the **waste tank** before starting to use the toilet and every time the tank has been emptied.
